**The Key To Your Success...
Begins with The Technology Alliance**

Technology is... the Core of Our Business

The Technology Alliance (TTA) team consists of experienced technical personnel who understand the current IT landscape and the importance it places on responding to Client requirements.

With our practical knowledge of the IT industry, we can attract the technical resources needed to support a variety of IT processing ranging from legacy to cutting-edge technologies. TTA's screening and qualifying process ensures that our candidates have the required technical skills, business knowledge and personality to suit the Client's working environment. Our flexible staffing approach helps Client organizations in three ways:

- » Managing and maintaining current workloads.
- » Supporting new initiatives and special projects.
- » Leveraging existing resources for improved productivity.

From Small Businesses... to Fortune 500 Corporations

TTA's Clients include a mix of companies in varied industries. Our driving mission is to focus on Client requirements, develop a proven technical approach and efficiently implement a solution in a timely and cost-effective manner. From small businesses to mid-sized companies to Fortune 500 corporations, we have successfully built lasting relationships with our Clients based on our commitment to excellence and professionalism.

Our Client list includes companies in the following industries:

- » Business Marketing
- » Direct Marketing
- » Financial Services
- » Government Agencies
- » Investment Banking
- » Manufacturing
- » Market Research

Solutions from Legacy... to Web-based Applications

TTA's staffing personnel are decidedly qualified to attract the technical resources needed for today's exacting job assignments. For our Clients, this translates to identifying the individual with the appropriate technical and personal qualifications to work in their company's environment. For our Candidates, this enables us to offer a variety of job positions at locations throughout the country.

We offer opportunities in a wide range of information technology roles including:

- » Application Developers
- » Project Managers
- » Business and Quality Assurance Analysts
- » Network Engineers
- » Database/System Administrators

James Contello established The Technology Alliance (TTA) in 1994. His goal was to enhance the level of IT recruitment services by leveraging his extensive technology background obtained through years of computer consulting. This "hands on" experience translates into a better understanding of his clients staffing requirements and their overall technology environment.

The Solution Provider... To the World of Information Technology

Mr. Contello and the TTA team bring a highly effective balance of technology, business management, and recruitment experience to their customers. With each individual client relationship, they work to cultivate a true partnership, positioning TTA as an extension of their clients' organization, in order to provide a true value-added service.
